

WASIM MOHAMMAD

Amman – Jordan | (+962) 79-571-9693

Web Developer | wsmohd87@gmail.com

OBJECTIVE

Versatile and solutions-oriented full stack developer with a strong background in educational technology, software engineering, and scalable web architecture. Adept at building intuitive, user-first applications across the full development cycle—ideation, prototyping, deployment, and iteration—using a modern tech stack including JavaScript, React, Node.js, MongoDB, and SQL.

Brings a creative mindset and a passion for clean, mobile-first design to every project, consistently delivering seamless digital experiences that drive engagement and usability. Experienced in troubleshooting complex systems, optimizing backend processes, and integrating APIs to enhance workflow efficiency. Known for thriving in collaborative environments, bridging communication between technical and non-technical teams, and contributing meaningfully to agile development cycles.

Whether architecting learning platforms, developing feature-rich web tools, or elevating content delivery systems, I combine technical know-how with problem-solving agility to build impactful solutions that move ideas forward. Currently seeking a dynamic role within an innovative organization where I can apply my adaptability, deep coding expertise, and passion for user-centric design to shape the future of digital interaction.

SKILLS AND ABILITIES

Technical Skills

- **Programming Languages & Scripting:** JavaScript (ES6+), HTML5, CSS3, SQL, NoSQL, LINQ, C#.Net, and Java.
- **Frameworks & Libraries:** React, Node.js, Express.js, Handlebars, jQuery, Bootstrap, React Bootstrap, Sequelize.
- **Databases:** MongoDB, MySQL, SQL Server 2008, SQL Server 2022.
- **Development Tools & Platforms:** GitHub, TFS (Team Foundation Server), RESTful APIs.
- **Full Stack Development:** Capable of building and deploying web applications from frontend UI/UX to backend servers and databases.
- **Mobile-First Design Focus:** Strong emphasis on responsive, user-friendly interfaces tailored for mobile users.
- **Content Migration & Web Publishing:** Experienced in converting and restructuring digital content, including code troubleshooting and QA testing.
- **Database Optimization & API Integration:** Skilled in creating efficient queries, stored procedures, and integrating APIs for dynamic content delivery.

Projects Skills

- **Project Execution from Ideation to Delivery:** Has taken several projects from concept to completion, emphasizing teamwork, functionality, and design.

- **Cross-Functional Collaboration:** Proven ability to communicate across technical and non-technical teams with daily reporting and progress tracking.
- **End-to-End Product Development** Experienced in taking web applications from initial concept through design, development, testing, deployment, and iteration.
- **Agile Development Methodologies** Familiar with agile workflows, sprint planning, version control, and iterative collaboration in fast-paced environments.
- **Quality Assurance and Debugging** Skilled in both manual and automated testing, with strong debugging skills to identify issues across frontend and backend.
- **Performance Optimization** Knows how to improve web application performance through efficient code, optimized queries, and streamlined data flow.

Personal Attributes

- Highly motivated, conscientious, and enthusiastic.
- Creative thinker with humility and initiative.
- Clear written and verbal communication with teams and stakeholders.
- Proactive problem-solving and analytical thinking.

EXPERIENCE

Business owner – Car Dealership Companies

Denver, CO United States

2015 – 2025

- **Building internal tools** for sales tracking, inventory, or customer management.
- **Automating repetitive sales tasks** (e.g., lead follow-up, reporting).
- **Creating or improving a dealership website** with features like online booking, inventory browsing, or payment integration.
- **Data analysis** of sales trends using dashboards or custom reports.
- **Digital Car Sales Platform**
Build a web app for used/new car listings with integrated payment, financing, and customer chat.
- **CRM Customization for Car Dealerships**
Using my skills to tailor CRM systems to the specific needs of car sales teams.
- **Sales Analytics Dashboard**
Create a tool that visualizes sales performance, customer demographics, and inventory turnover.
- **Online Training Portal for Sales Teams**
Develop a platform to train new salespeople using interactive content and progress tracking.

Web Content Assistant

Pearson, Centennial, CO – United States

2014 – 2015

- Converted raw course content into static and/or interactive, web-ready content for the eCollege course delivery system.
- Migrated content between platforms using defined course maps, including moving and re-linking code and files.
- Added text and images to online courses.
- Retrieved and troubleshoot automated errors during the conversion process and implemented solutions.
- Developed online educational content using HTML, CSS, JavaScript, etc., including creating new code and reconstructing existing code.
- Performed Quality Assurance testing on both automated and manual work.

.Net Developer

Child Care Aware of America, Arlington, VA – United States

2013-2013

- Worked on a 3-tier architecture (Presentation, Business, and Data Access layers) using MVC & Razor page.
- Used LINQ to SQL for data retrieval from SQL Server 2008.
- Created stored procedures, functions, and optimized queries.
- Utilized WCF for data integration between distributed components.
- Implemented client-side validations using JavaScript.
- Used TFS for version control.

EDUCATION

• **Colorado Technical, University of Aurora, CO**

2012

Masters in Information Technology

• **The Hashemite University, Zarqa - Jordan**

2009

Bachelor degree in Software Engineering

COURSES

-
- [2025] **Java Developer Online Course with Revature**
 - [2023] **.Net Developer Online Course with Udemy**
 - [2022] **Coding Bootcamp Certificate, University of Denver, Denver, CO**

COMMUNICATION

I believe in fostering clear and open communication by actively listening, being transparent, and encouraging collaboration. My experience in both IT and car sales has taught me how to connect with people from diverse backgrounds—whether it's explaining technical solutions to non-technical clients or understanding customer needs on the showroom floor. I strive to create an environment where ideas are shared freely, feedback is welcomed, and everyone feels heard. By translating complex concepts into simple language and maintaining open dialogue, I help teams stay aligned and focused on shared goals.

PROJECTS LEADERSHIP

I take pride in leading projects from concept to completion, ensuring that every phase—from planning and development to deployment—is executed with precision and collaboration. During my time at the University of Denver Coding Boot Camp, I led and contributed to several full-stack applications, including an online ordering system (*Five Guys*) and a flashcard learning platform (*Stud Light*). I coordinated with cross-functional teams, delegated tasks based on individual strengths, and maintained clear communication to keep everyone aligned. My approach combines technical expertise with a strong sense of ownership, allowing me to guide teams through challenges and deliver high-quality, user-focused solutions.
